SUMMARY

Junior software developer with paid client experience delivering responsive websites, CRM and form workflows, print-ready brand collateral, and Python data tools. Comfortable owning projects from requirements and visual design through implementation, QA, production support, and stakeholder handoff.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, Java, HTML5, CSS3, Liquid

Web & Data: NationBuilder, WordPress, React, Flask, Spring Boot, pandas, REST APIs, webhooks, PostgreSQL, MySQL

Delivery: Git, Docker, Linux, responsive QA, print-ready PDF/SVG, 600-DPI assets, QR codes, technical documentation

PROFESSIONAL EXPERIENCE

Independent Web Developer & Designer | TroyByte / Client Projects | Jan 2025 - Present

Victoria, BC

Selected live work: [SafeVictoria.ca](#)

- Designed and delivered four client NationBuilder sites, including two custom campaign templates and SafeVictoria, with responsive donation, pledge, signup, contact, and content workflows.
- Built an 11-page platform hub and reusable Liquid/HTML/CSS layouts; produced social-share graphics, favicons, and desktop/mobile QA previews at 1440px and 375px.
- Created paid identity and print packages for three clients: double-sided 4×9-inch brochures, business cards, 24×16-inch signs, QR assets, 600-DPI exports, and outlined vector files.
- Maintained client websites and web infrastructure through CRM forms, preference-center work, compliance updates, production fixes, and direct stakeholder support.

Software & Data Engineer (Contract) | Regional Organization / Client Systems | Nov 2025 - Present

Victoria, BC

- Built Python/pandas workflows to clean, normalize, match, and deduplicate 10,000+ CRM records, reducing manual spreadsheet review by an estimated 60%+.
- Developed reusable web components, backend webhooks, CRM segmentation, and documented handoffs for repeatable operations.

Web Developer / Email Marketer | TBahama Marketing Solutions | Oct 2019 - Jun 2022

Victoria, BC

- Built and maintained WordPress and LAMP websites and MySQL-backed applications; deployed updates and resolved production issues.
- Managed marketing datasets with 1M+ records and supported email operations, database maintenance, and client web updates.

SELECTED PROJECTS

[Fundraising Intelligence](#) | Python, Streamlit, pandas, Electron

- Built a local desktop dashboard that transforms NationBuilder transaction exports into revenue breakdowns, donor segments, contribution-limit checks, and outreach lists without transmitting donor data externally.

[CSV Record Pipeline](#) | Python, pandas, YAML, unittest

- Developed configurable workflows for normalization, deduplication, matching, enrichment, scoring, and review-ready exports through CLI and local web interfaces.

[Spring Boot Webstore](#) | Java 17, Spring Boot, JPA, MySQL

- Built a server-rendered webstore with customer and administrator authentication, session-based carts, transactional checkout, Flyway migrations, Docker, and integration tests.

EDUCATION

Diploma in Computer Programming | Algonquin College | 2025

Ottawa, ON
