SUMMARY

Junior software developer with a Computer Programming diploma and experience building client websites and Python data workflows. Projects demonstrate Java/Spring backend development, record reconciliation, and local-first applications with automated tests.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, HTML/CSS, Liquid

Backend & data: Spring Boot, Spring Security, JPA, FastAPI, pandas, MySQL

Tools & testing: Git, Docker, GitHub Actions, Flyway, JUnit/MockMvc, pytest

SELECTED PROJECTS

Spring Boot Webstore

Java 17, Spring Boot, JPA, MySQL

- Implemented transactional checkout with server-calculated prices, inventory row locks, and cart clearing after commit.
- Added role-based access, Flyway migrations, and integration tests for price tampering and session isolation; automated tests and Docker builds in GitHub Actions.

InboxBoard — Email-to-Kanban Service Desk

Python, FastAPI, Pydantic, SQLCipher

- Built an email-to-Kanban application with IMAP intake, a local FastAPI interface, and SQLCipher-encrypted storage.
- Validated structured AI output against schemas and source evidence; routed high-risk or incomplete requests to human review.

CSV Record Pipeline

Python, pandas, YAML

- Implemented indexed candidate matching, multi-field scoring, and unit-conflict checks with explanations and separate match/review outcomes.
- Exposed YAML-configured jobs through CLI and local web interfaces; added end-to-end tests using 1,000-record synthetic fixtures.

PROFESSIONAL EXPERIENCE

Data and Systems Coordinator

Nov 2025–Present

Local Electoral District Association · Contract

- Built Python and pandas workflows to normalize, match, and deduplicate CSV exports for recurring CRM data review.
- Maintained NationBuilder data quality and segmentation across thousands of supporter, donor, and household records.

Contract Web Developer

Jan 2025–Present

Independent / Client Projects

- Built four production NationBuilder websites using Liquid, HTML, CSS, and JavaScript for campaign clients.
- Delivered donation, signup, volunteer, event, and contact pages, plus frontend updates and production support.

Web Developer / Email Marketer

Oct 2019–Jun 2022

TBahama Marketing Solutions

- Built and maintained LAMP-based websites and WordPress installations for client projects.
- Supported MySQL-backed applications, marketing datasets, and email campaigns, including web updates and backend maintenance.

EDUCATION

Diploma in Computer Programming

Jan 2025

Algonquin College
